

Performance Data

Crestwood is committed to enhancing transparency and disclosure of our environmental, social and governance (ESG) performance. Our 2019 sustainability report is prepared in accordance with the Global Reporting Initiative (GRI) Standards – Core option and the Sustainability Accounting Standards Board (SASB) midstream framework. As we progress on our sustainability journey, we will continue to improve our key performance indicators in ESG areas.

Unless otherwise specified, all data represents a full calendar year and excludes our Joint Ventures to align with our financial reporting.

³ Crestwood restated Scope 1 emissions data for 2018 to reflect the removal of our Joint Venture assets. This change was made to align with our financial reporting.

⁴ Crestwood restated Scope 2 emissions data for 2018 to reflect the removal of our Joint Venture assets. This change was made to align with our financial reporting. Additionally, in 2019, efforts were made to enhance the collection process of Scope 2 emissions data, more accurately representing emissions from smaller assets. This enhanced collection method was also reflected in the 2018 Scope 2 emissions data.

⁵ Crestwood restated its spills data for 2018 to reflect the removal of our Joint Venture assets. This change was made to align with our financial reporting. Additionally, in 2019, efforts were made to enhance data collections processes and data is now more accurate.

^{6(a)} Acreage of land used in this analysis is based on acreage we operate, which is most of the land we own and lease. There may be additional land that is owned and leased, but not operated, which is not included in this analysis. Acreage operated for pipelines includes land within a 30-foot average corridor of a pipeline's centerline. This analysis deviated from the SASB standard for our operations and used the U.S. Fish & Wildlife Service (USFWS) designated areas for "endangered species" as this dataset is more reflective of biodiversity risks posed by our operations. The dataset was acquired in the first quarter of 2020 from the USFWS Environmental Conservation Online System. Analysis was completed using our asset GIS datasets as of the first quarter 2020. Facility acreage is not included in this 2019 sustainability report. Those acreages are being incorporated into Crestwood's GIS data system and will be included in the 2020 analysis.

^{6(b)} Defined as operated land within five (5) kilometers of the boundary of an endangered species habitat.

^{6(c)} Defined as operated land within the boundary of an endangered species habitat.

Environmental Management			
Air Quality	EM-MD-120a.1	Air emissions of the following pollutants: (1) NOx (excluding N2O), (2) SOx, (3) volatile organic compounds (VOCs) and (4) particulate matter (PM10)	Environmental Management > Criteria Air Emissions
Biodiversity and Land Use			
Ecological Impacts	EM-MD-160a.1	Description of environmental management policies and practices for active operations	Biodiversity & Land Use > Approach
	EM-MD-160a.2	Percentage of land owned, leased and/or operated within areas of protected conservation status or endangered species habitat	Biodiversity & Land Use > Percentage of Land Owned within Areas of Protected Conservation Status or Endangered Species Habitat
	EM-MD-160a.3	Terrestrial acreage disturbed, percentage of impacted area restored	At this time, Crestwood does not collect this data. We will assess collecting this for future reporting years
Government Relations and Regulatory Compliance			
Competitive Behavior	EM-MD-520a.1	Total amount of monetary losses as a result of legal proceedings associated with federal pipeline and storage regulations	Regulatory Compliance > Data

ACCOUNTING METRICS CONTINUED			
Spill Prevention Control and Emergency Response			
Ecological Impacts	EM-MD-160a.4	Number and aggregate volume of hydrocarbon spills, volume in Arctic, volume in Unusually Sensitive Areas (USAs) and volume recovered	Spill Prevention Control & Emergency Response > Data
Operational Safety, Emergency Preparedness & Response	EM-MD-540a.1	Number of reportable pipeline incidents, percentage significant	Spill Prevention Control & Emergency Response > Data
	EM-MD-540a.3	Number of (1) accident releases and (2) non-accident releases (NARs) from rail transportation	Spill Prevention Control & Emergency Response > Data
	EM-MD-540a.4	Discussion of management systems used to integrate a culture of safety and emergency preparedness throughout the value chain and throughout project lifecycles	Spill Prevention Control & Emergency Response > Emergency Response Training & Drills
Asset Integrity			
Operational Safety, Emergency Preparedness & Response	EM-MD-540a.2	Percentage of (1) natural gas and (2) hazardous liquid pipelines inspected	Asset Integrity > Data
ACTIVITY METRIC			
	EM-MD-000.A	Total metric ton-kilometers of: (1) natural gas, (2) crude oil and (3) refined petroleum products transported, by mode of transport	This metric was omitted based on the lack of applicability. Instead, Crestwood reports our greenhouse gas emissions intensity as a function of EBITDA (metric tons CO ₂ e/\$MM EBITDA) and methane intensity metric in accordance with the Edison Electrical Institute guidance. We believe that these metrics provide the most information about the impacts of our operations and comparability for our stakeholders
